## Mrs. Ann Barber Buried Monday

Funeral services for Mrs. Ann Barber, 71, who died at her home east of Carbon Friday, September 29, were held Monday afternoon at 2:00 p.m. from Christ Church, Carbon, with Rev J.W. Way officiating. Winters funeral home of Drumheller was in charge of arrangements and interment was made in the Carbon cemetery.

Pallbearers were Fred Bessant, Ross Thorburn, Ross Fraser, Ed Foster, Sam Garrett and Charles Smith.

Born in England in 1879 Mrs. Barber emigrated to Canada in 1913 and settled at Swalwell. In 1916 she moved with her family to Verdant Valley, east of Drumheller, and in 1919 came to Carbon, where she resided until her death.

Surviving are a daughter, Mrs. E.J. (Mary) Harrison of Drumheller; a son, Jack of Carbon; five grandchildren and one great-grandchild. Her husband, Robert, predeceased her in 1943.

Response to the Blood Donor Clinic in Carbon last Thursday was far below expectations, with only 59 donors contributing blood compared to 79 last year. It is hoped that next year more people will realize the importance of the Red Cross blood bank as a means of saving lives and give more enthusiastic support when the clinic comes again.

## LITTLE NEWS ITEMS OF LOCAL INTEREST

Born to Mr. and Mrs. Ben Fox on Friday, October 22, a son.

Misses Elaine and Marion Torrance of Calgary were weekend visitors at the home of their parents.

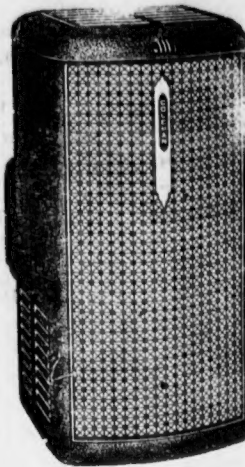

The Zion Baptist Young People 'Commissioned Youth for Christ', presented a play, "The Challenge of the Cross," before a well packed house in the Trochu Baptist Church Sunday evening. The play was well rendered and well received.

Chris Thumliert, Bill Ross and Gottlieb Eslinger left Sunday on a goose hunt in the Castor district. Another party consisting of Len Poxon, Francis Poxon, Dale Poxon and Jim Flaws of Carbon, and Ed Rouleau of Didsbury also left Sunday to hunt geese near the Saskatchewan border.

Mr. and Mrs. John Wood and son, Billy, were Calgary visitors over the weekend.

Rev. and Mrs. J. G. Rott and daughter Carol Ann have returned from a trip to Avon, N.D., where their son Dale is staying to attend high school. Besides his studies, Dale is taking shop and band work, and also plays on the football team. After Christmas he will play on the basket ball team.

## Lloydminster Oil Field Output Rises

Oil production in the Lloydminster field amounted to approximately 172,188 barrels during August, or roughly an average of 5,554 barrels a day, according to a preliminary report of the Lloydminster Petroleum association.

Production in August showed a slight increase over July when 171,220 were produced for a daily average of 5,523 barrels from a field total of 245 wells.

A breakdown of totals for July showed that on the Saskatchewan side of the field 95,406 barrels for a daily average of 3,077 barrels from 141 wells.

In comparison, the Alberta side had produced 75,816 barrels for a daily average of 2,445 barrels from 104 wells.

Figures showed, however, that Alberta led in average well production with 729 barrels per well during the month compared with an average production of 676 barrels per well from the Saskatchewan producers over the same period.

It was learned from the report the net total refinery deliveries for the first seven months of 1950 amounted to 1,072,140 barrels, of which 589,861 barrels had been produced in Saskatchewan and 482,279 barrels in Alberta.

### WINS FISHING CONTEST

FLIN FLON, Man. — Henry Cross was declared winner of the Gail Motors and Chamber of Commerce fishing contest. He is credited with catching the largest fish, a 27-pound trout, in local waters, with the proper registration rules in connection with the contest observed.

—Central Press Canadian.

**THE BETTER TO HEAR YOU WITH**—New use for a bunny is demonstrated by little Patricia Livermore at Pomona, Calif., whose wrap is the 27-inch ear span of "Sir Edward", champion English lop rabbit.

### Hasty Retreat

ANCHORAGE, Alaska. — An American soldier beat a hasty retreat during mock war manoeuvres when an "enemy soldier" he challenged with a rifle loaded with blank cartridges turned out to be a big brown bear.

## WESTERN BRIEFS

### Farm Loans

PRINCE ALBERT, Sask.—C. Sydney Frost, general manager of the Bank of Nova Scotia, said he does not anticipate any immediate tightening up on farm production loans. He noted that the recent emergency federal budget left the matter to the discretion of the banks.

### For Tall Men, Women

WINNIPEG. — Attention all men over six feet and all women over five feet 10 inches! The Y.M.C.A. has announced the formation of a club especially for those who are taller than the average. Name of the club? The Winnipeg Tip-Toppers.

### Engineers Train

CHILLIWACK, B.C. — The engineering section of Canada's special service brigade for possible action in Korea is in the midst of mountain training. At the camp of the Royal Canadian Engineers, a few miles from here, the 400 men of the section find the Fraser valley an exact counterpart of the mountainous terrain in Korea.

### Big Nautical Beat

VANCOUVER.—A 93-mile nautical beat where tots may be "lost at sea" or sailors stranded on sand bars is the responsibility of two Vancouver city constables. In their 40-foot police crash boat, John Knight and Roy Chapman are protectors of the city's harbor front water line. They've done the job so well that when two years ago the service was eliminated as too expensive, the outcry brought them back in two months.

### SASK. MAN CHOSEN

OTTAWA.—William R. Vallevand, 20, Domaine, Sask., is one of three men from the "lower deck" of the Royal Canadian Navy who have been promoted to cadets and chosen to attend the Canadian service college at Royal Roads, Victoria. 2900

### BUYS OIL RIGHTS

REGINA.—Bata Petroleum limit-ed of Regina has sold half its 246,800-acre freehold rights held under lease from C.P.R. to Royallite Oil company, Canada's second-largest producer of crude oil. The sum involved was not disclosed. The acreage is the area of North Battleford and Biggar near the Alberta border.

### FREIGHT BOOST PROTESTED

EDMONTON.—The Alberta government is protesting to Ottawa against increased freight rates which went into effect earlier this year on certain classes of livestock. Premier E. C. Manning announced. Alberta is seeking the co-operation of the Manitoba and Saskatchewan governments in the move.

**MAGIC** cake

COCONUT FUDGE  
CHIFFON CAKE

Mix and sift into a bowl, 1 c. plus 2 tbs. once-sifted cake flour, 1½ tps. Magic Baking Powder, ½ tsp. salt, ¼ c. fine granulated sugar; mix in ½ c. desiccated coconut. Make a well in the dry ingredients and add in the order given (do not stir mixture), ¼ c. corn (salad) oil, 2 unbeaten egg yolks, ¼ c. plus 2 tbs. water, 1 tsp. vanilla, 2½ ounces unsweetened chocolate, melted and cooled. Stir the liquids to intermingle, then stir in the dry ingredients; beat until batter is smooth. Measure into a large bowl ½ c. egg whites (at room temperature) and sprinkle with ¼ tsp. cream of tartar; beat until the egg whites are very very stiff—much stiffer than for meringues, angel cakes, etc. Add flour mixture, about a quarter at a time, and fold after each addition until batter and egg whites are thoroughly combined. Turn batter into an ungreased 8" angel cake pan; bake in a rather slow oven, 325°, about 1 hour. Immediately cake comes from oven, invert pan and suspend cake until cold.

Don't wait until next winter—now is the time to insulate! GYPROC WOOL Insulation enables home owners to save up to 30% in fuel costs, yet the house is kept warm and comfortable in spite of the coldest weather.

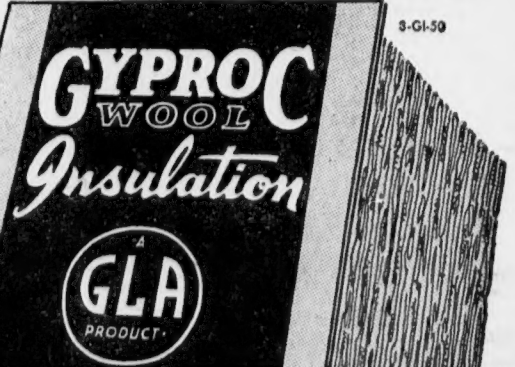

With GYPROC WOOL protecting your house, every bit of heat from your fuel is made to work—it is kept inside to warm you, instead of being allowed to escape through walls and roof to the outside.

GYPROC WOOL will give you comfort this coming winter—and

year after year, for GYPROC WOOL is the "Lifetime Insulation". It is mineral; does not deteriorate; is moisture-resistant and fire-safe; and permanently retains its insulating properties.

Write for a copy of "Insulation Manual", which explains how insulation works and shows how easily GYPROC WOOL may be installed in your home.

A G-L-A Product, made by Gypsum, Lime and Alabastine, Canada, Limited, and sold by Builders' Supply, Lumber and Insulation Dealers across Canada.

### THE TILLERS

—By Les Carroll

## Electronic Brains Save Thousands of Hours of Labor

Inventor Harry D. Belock, (left), Feeds the "Electronic Brain" a Problem.—Central Press Canadian.

By JOHN GOETTE  
(CPC Correspondent)

Industry for the first time has access to the newest mathematical automaton, the Claude Neon Reac, a startling post-war development of the Special Devices centre of the Office of U.S. Naval Research. The navy has lifted its top-secret, high-priority rating on this "electronic brain".

The Reacs, worth a million dollars, already have proven their practicability to navy problem solvers as well as to a restricted selection of co-operating industrial plants.

Now, any firm or university can purchase Reac units at from \$17,000 to \$35,000. They are no larger than five office filing cabinets, and can be plugged into an electric outlet and set immediately to work.

Developed for the navy under Harry D. Belock in the New York laboratories of the Reeves Instrument corporation, Reac is the coded form for the Reeves Electronic Analog Computer.

Belock's invention solves problems 30 times faster than old non-mechanical methods. In one case, Reac produced a complex answer in 108 man-days against an estimated 11 years required by ordinary computation.

Another example of what this single line of post-war navy research has done for private industry was the solution of a problem by Reac at

a cost of only \$3,240 compared with a probable \$73,725 if it were worked out otherwise. These computers cut such operational costs by an average 95 per cent.

Thanks to navy development and release of the "electronic brain", industry has an instrument which makes economically feasible the solution to a wide range of the most intricate mathematical problems confronting research and engineering groups.

In the automotive field it solves problems in the performance of internal combustion engines, ignition, carburetor development work and improvement in a car's riding ability. In civil engineering it computes and solves problems with respect to bridge vibrations and stress analyses.

The Reac likewise simulates actual plant processes for automatic industrial controls and supplies valuable data in the field of hydro-dynamics relating to hull design, underwater "drag" and estimation of friction.

The "electronic brain" tests airplanes before they are built, automobiles before they are assembled, and chemical processes before they are put into operation. Designs that will give the optimum performance can be determined without actually building an aircraft or even a model.

Only 12 minutes are necessary to set equations for Reac, very much like plugging in a telephone switchboard. The results instantly appear on a graph drawn by an inked pen on paper in the plotting board, or on a six-channel graph recorder.

As the patient Dr. Belock explains it for the layman: "You say to the computer, 'I'm an airplane.' Then you hook up an automatic pilot which will fly the Reac just as it would fly modern aircraft 10,000 feet above the earth's surface.

"During such a flight any 'bugs' in the design or operation become apparent and can be rectified by a mere twist of Reac dials. This saves time and money, since it makes expensive models and trial designs unnecessary," Belock points out.

Expanding the miracle of mechanical computing, you can appeal to Reac that "your wings are iced" or that "anti-aircraft fire has struck your tail." Reac then will show the exact performance of your unbuilt plane, simulated as flying under any conceivable condition that you feed into its dials.

## Canadian Fashion

Above, "Sidney", a double breasted suit, its jacket having very wide revers and skirt centered with one pleat in the back.

## GEMS OF THOUGHT

### WORDS

Language is the only instrument of science, and words are but the signs of ideas.—Samuel Johnson.

Words are not always the auxiliaries of Truth. The spirit, and not the letter, performs the vital functions of Truth and Love. — Mary Baker Eddy.

The deepest truths are best read between the lines, and, for the most part, refuse to be written.—A. Bronson Alcott.

Among the sources of those innumerable calamities which from age to age have overwhelmed mankind, may be reckoned as one of the principal, the abuse of words.—George Horne.

Without knowing the force of words, it is impossible to know men.—Confucius.

Think all you speak; but speak not all you think; Thoughts are your own; your words are so no more.—Henry DeLaune.

### THIS ONE WAS SURE

"Here you are, ladies and gentlemen," shouted the tipster. "What did I tell you yesterday?"

Nobody answered the question, and the tipster resumed his shouting. "Didn't I say Broad Bean wasn't a runner?" he yelled. "And didn't I say Water Tap would still be running, and that Dusty Carpet would take a lot of beating?"

Still there was no answer. But the tipster was not dismayed. "Now," he cried, "I've a certainty for the next race. Back Loose Button; it's sure to come off."

### A STEADYING INFLUENCE

—Smith, in The Birmingham Post-Herald.

## Need Spiritual Reserves When Adversity Comes

By M. JANE SCOTT in  
Toronto Globe and Mail

There are a lot of people who give a wonderful performance on the stage of life while the limelight is focused upon them, who fail miserably when they are suddenly forced to lie for long periods under a bed light, suffering in varying degrees. It often takes a long time for these shining stars to adjust themselves to their fate. Too often they have failed to build up spiritual reserves upon which they can draw when adversity and misfortune suddenly overtakes them.

Eighteen months ago we were lying in a sick-bed listening to the news when the announcer read, "Radio commentator Claire Wallace fell today and fractured her hip while on a flying visit to Australia."

Our first reaction to the news was a sincere prayer that our contemporary and friend might find grace to help in the hour of need. It so happened that Claire and this writer had joined the Women's Press Club on the same night many years ago, but our paths and our lives have run counter ever since. We were both too busy with our own affairs to touch each other very intimately.

In a recent magazine article, Claire told the story of her long months of suffering and spiritual triumph. When we read it we thanked God, for in it we saw the answer to our prayer. In a telephone chat later she told us how many times she had found strength in these columns. On a visit to her sickroom, together we went over many of the wonderfully comforting Scriptures that have brought renewed hope and courage to millions of sufferers through the centuries.

"Jane," she asked, "what are your favorite Bible verses?" We gave a long list of Scriptures that had come to us in days of deep need. We mentioned the beloved 23rd Psalm, which we often use when visiting the sick. It is so full of meat for the fainting soul. "Oh, Jane," she exclaimed, "with a wealth of sincerity in her voice, 'I repeated that Psalm a thousand times during the very hard days and nights that have followed since I was suddenly bowled over.'"

Then she told us the story of her hectic life, how she had been carried on wave after wave of excitement, running hither and yon, tense, too busy and too excited to "be still and know God."

"I wanted to stop and couldn't," she said. "Suddenly, without warning, the world reeled and I was down. Every one has been so kind, the nurses, doctors, friends and acquaintances," she went on.

"Claire," I said, "when I was a child I often stood speechless before Hope's pet shop window on Queen St. W. and watched a poor little chipmunk wasting his energy running a treadmill. Everytime I listened to

your girls in the big league and in the limelight, I thought of that poor creature working so hard and in reality getting nowhere. So often we are like the busy little squirrel on the treadmill. When we ought to be quietly busy using our precious energy gathering some nuts for the hard, cold, fruitless days that may come, we are merely beating the air. I think that our loving, heavenly Father senses our souls' need and in His love and mercy He makes us to lie down.

"You know," I went on, "how a tired child reacts? The more it needs rest and sleep, the harder it fights to keep on its irritable way. One must simply take that little one by force, and wash its tired brow with a fresh cloth and lovingly, but firmly put him into his cot, because he doesn't know his own need.

"That is exactly what has to happen to a lot of men and women who have not learned how to rest in the Lord. They are tense and irritable and tired, but they have not the sense nor the moral courage to stop until they are suddenly knocked out, so, He maketh us—with emphasis on the maketh us—to lie down in green pastures, and while we are lying, He restores our souls, and what is more, He leads us in the paths of righteousness."

We think today of one of our readers who has lain in the Peterborough Hospital for many months with a broken hip and arthritis, and of another minister's widow who within the past year has had both hips broken. Among us are literally thousands of men, women and children who are asking why have I been stricken?

There is often a feeling of resentment in the hearts of men against the blows of fate. This is especially true of men and women who have risen to great heights of fame, or fortune. In their good days they take all the credit for their fortunes in life, but when trial comes they curse God and blame Him for their suffering and failures.

It is refreshing to visit a shut-in, as we did our friend Claire, and leave with the feeling that here is a person whose soul is in the process of restoration. She may never soar so high again, but we know from our own experience that her roots will go deeper and deeper into the eternal springs as she rests in the Lord and waits patiently for God's answer to the baffling question. Why have I been stricken? It will come like a lovely rainbow of promise silhouetted against the clouds of life. To all our afflicted readers, we recommend again the 23rd Psalm.

The first woman printer in the U.S. was Dinah Nuthall, who worked in Annapolis, Md., in 1696.

## On The Side : By E. V. Durling

Are you in your twenties? How would you like to live ninety years more? If such longevity appeals to you, start consulting a physician even if you are in the best of health. The idea is to obtain "preventive" medical treatment. To ward off ailments. Such is the advice of many experts on the subject. The system is somewhat similar to that used by the Chinese for centuries. A Chinese pays his doctor a regular fee as long as he, the patient, is in good health. But when he gets sick the doctor gets nothing until the patient is restored to health. Then the payments are resumed.

### Lie Detector Analysis

Of what value is the so-called "lie detector" in criminal and other legal investigations? Lawyers from 42 countries recently met in London and the majority condemned the lie detector as being far from infallible. They had the same opinion of the so-called "truth drug".

### Sensitive Fellows

Is your husband bald? If so, perhaps you are to be congratulated. It has been claimed bald-headed men are great lovers. That claim may be open to question. However, there is no doubt bald-headed men are usually sensitive fellows. They are not fond of hearing facetious remarks about their lack of hair. In a recent case a husband included in his grounds for divorce that his wife was always "making smart cracks about his being bald." He claimed this constituted cruelty. The court agreed with him.

### Red, White And Blue

In Korea if a girl is not married when she reaches the age of 20 she is considered a disgrace to her family. The wedding gowns of Korean brides are red, white and blue. This brings to mind that for centuries the wedding gowns of European brides were red. Mary Queen of Scots was the first celebrated bride to wear a white wedding gown.

### Beard And The Man

When cast for a part which called for his wearing a beard, Clark Gable objected strongly, saying: "Beards are not romantic. Women don't like them." If Mr. Gable had taken a look at the record he would have found some of the greatest winners of women's affections of all time were bearded men. It has been said wearing a beard make a man more masterful. That may be the answer to the success of bearded men as heart-throbs.

### For Your Life

Am asked how much faster can a man run when really scared. For example, when being chased by a mad bull, or pursued by persons intent on killing him. The answer is that when scared a man doesn't run much faster than he would circling the bases in a ball game. However, when it is a matter of life or death he can maintain his top speed for a longer distance. The urge for self-preservation increases the endurance.

### Scottish Response

Colin Barber, British lad, who recently completed a 2,500-mile hitchhiking trip in Great Britain and on the continent, said that he was never refused a lift in Scotland. Every time he gave the hitch-hiker's sign to a Scot it clicked!

## World Happenings Briefly Told

Houses are being built for old-age pensioners from the rubble of a blitzed site in Great Yarmouth, England.

Barbed mesh and tripwire alarms have been installed around the church in Welling, Kent, England, to keep out intruders who have been smashing fixtures.

United States steel production in the first eight months of 1950 totalled 63,372,602 tons, an all-time high, the American Iron and Steel institute reported.

More than 20,000 visitors to the Canadian National Exhibition in Toronto took advantage of free chest X-rays provided at a mobile unit on the C.N.E. grounds.

The Japanese government has decided to ban cycle racing, a sport which has caused nearly 10 serious riots since it was introduced into Japan only a year ago.

The Alberta provincial government has purchased two mechanical tree planters for use to persuade farmers to plant more trees for roadside, farm and field shelters.

The unemployment insurance fund totalled \$582,646,972, at March 31 last, it was disclosed in the annual report of the unemployment insurance advisory committee.

John Cuckow of Maidstone, Kent, England, wasn't going to miss his diamond wedding anniversary celebrations for anything. So he got out of a hospital bed and went home—for one day.

### Weekly Tip

#### EASIER TO CUT

To avoid crushing or tearing fluffy meringue on a pie, coat your knife or server with butter before cutting into it.

The R.C.A.F. carried out 213 Search and Rescue operations during 1949. 2900

## Clay Deposit Being Tested For Healing

VANCOUVER.—A British Columbia clay deposit is being tested for healing properties already heralded as without "parallel in the world today".

Dr. Ernst A. Hauser, of the Massachusetts Institute of Technology, says a deposit about 280 miles up coast from here is valuable for healing cuts, burns and wounds. He says it is also helpful in the treatment of arthritis.

"I am perfectly prepared to put my reputation as an international scientist at stake in saying that this product is unique in every way," he recently told a business men's meeting.

The clay has been marketed recently. The deposit is located on King Island, below Prince Rupert. Further investigations of its properties are under way.

This hand was played at six tables in a Masters' Individual contest. In one case it was thrown-in, but at the other tables North opened One Heart after two passes in the hope of making a part score or indicating a favourable defensive lead. The fate of the hand depended on South's response.

In two cases he gave the only natural and safe response—One No-Trump—which was passed out. West with four tricks in the suit, and the subsequent defence allowed declarer to make nine tricks for top score.

At the remaining tables South considered his hand too strong for a "negative" No-Trump; one bid Two Diamonds, the other Two Clubs, which became the final and painful contracts.

## WHAT NAMES MEAN

### Calgary Mistaken In Meaning Of Name

CALGARY.—Calgarians have always taken for granted that the name of their city comes from a Gaelic word meaning "clear, running water". But now it appears that might not be so.

The late Col. James MacLeod, early Mounted Police officer, named Fort Calgary after his Scottish home in the Isle of Mull. His son, Norman MacLeod, recently visited Scotland and looked into the derivation of the name of Calgary.

His findings? The word Calgary might mean anything from "hard water", "a bristle", "a shelter", to a proper name.

### How Did Moose Jaw Get Its Name?

MOOSE JAW, Sask.—One of the commoner questions asked around town is: how did Moose Jaw get its name?

The legend usually told visitors is that it was named after a white man mended the wheel of his car with the jawbone of a moose.

But Mrs. Annie L. Wallis says that's ridiculous. She claims the Sioux Indians named the site Moose Jaw because the bend where two Creeks met was shaped like a jawbone.

She says that at that time there were no moose within hundreds of miles of the site of the present city.

Delicate instruments last up to 40 per cent. longer in jet planes than in the conventional motor type due to reduced vibration.

## PRISCILLA'S POP—Perils Of Fatherhood

**BRITISH FOOD POLICY**

Sir Stafford Cripps, chancellor of the British exchequer, said that the government will continue to get as much of Britain's food requirements from Canada as she can afford to pay for in dollars. This statement was made in reply to opposition suggestions that food purchases in Canada be in-

creased in view of mounting dollar reserves in Britain.

Britain's accumulation of dollar reserves has now reached a sum in excess of \$2,422,000,000.

If war comes again will we have another crisis over conscription? Recently the Financial Post asked a group of well informed citizens

about the problem. Their answers suggest that conscription would be inevitable and would be regarded by the public generally as so.

But it was suggested that to make the proposition more thoroughly acceptable as essential to victory there would have to be more determined government leadership on the question than in

previous wars, that the fairness and necessity of the system should be brought home to the public early in the developing crisis.

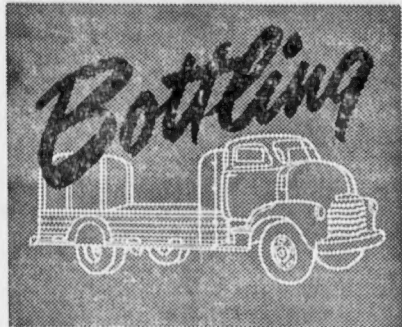

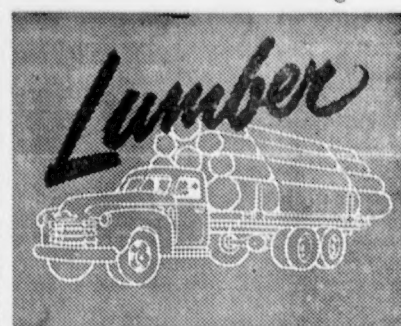

**PUTS TEETH IN CLOTHESPINS**

Winds may blow but clothes won't fall when a new plastic clothespin is used on washday, it is claimed. The clothespin is four

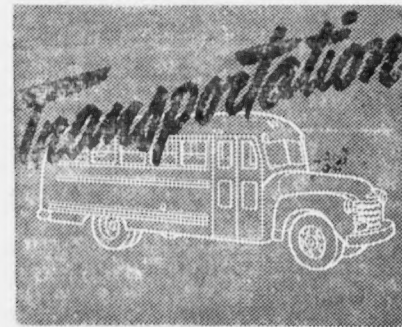

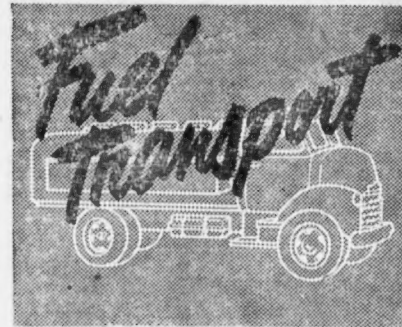

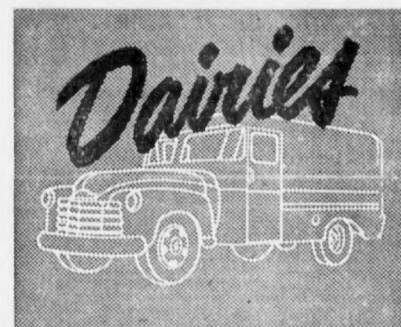

inches long and has three short teeth to grasp the clothes and line.

"Why don't you want to marry me?" he demanded. "There isn't anyone else, is there?" "Oh, Edgar," she sighed. "There must be!"

**INDO-CHINA EMPEROR VISITS POPE**—At his summer residence in Castelgandolfo, Italy, Pope Pius XII poses with Emperor Bao-Dai of Indo-China, (left), after the ruler and his Roman Catholic wife were received in a private audience by the Pontiff.—Central Press Canadian.

**CANADIAN CADETS HEAD FOR COLLEGE**—Fair winds favored the 70 navy, army and air force cadets on their sea journey from Vancouver to Esquimalt, last leg of their trip to the Canadian Services college at Royal Roads, B.C., to begin the college year. The first-year cadets made the voyage on board the frigate H.M.C.S. "Antigonish". For many it was their first sea experience; for most their first trip in a warship. This group of cadets from Quebec spent part of the voyage on the quarterdeck by the Ensign staff. Above they are, left to right: Claude J. Reinfret, Montreal; Christopher M. Seymour, Montreal; Ian A. MacDonell, Montreal; Harcourt S. Price, Quebec City; John D. Drew, Portneuf Station; Alan J. Shade, MacKayville; and Joseph G. Tardiff, Kamouraska.

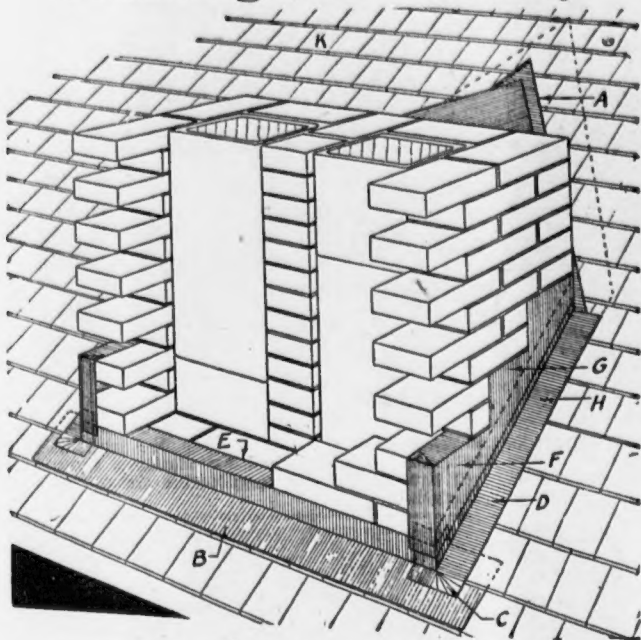

**OLDTIMER**—Don't look now kids but your grandfather probably remembers this 1901 model Oldsmobile, owned by Albert B. Garganigo, of Princeton, Mass. With its owner at the wheel—pardon, at the steering bar—car completed trip from Lake Placid to Montreal in about six hours. It has one cylinder and is easy on gas. More than 100 ancient autos drove to Montreal for the 1950 version of the Glidden tour. 2900

## FARM MECHANICS

Edited by Prof. L. G. Heimpel  
Agricultural Engineer, Macdonald College, Que.

### Flashing For Chimney

Drawing shows correct brickwork and flashing for chimney.

THE following are particulars on mortar and flashing required for a brick chimney:

A good mixture for a mortar for building chimneys is 1 part of cement, 1 part hydrated lime and 5 parts of screened sand. These three ingredients are mixed thoroughly in the dry state and then only sufficient water is added to make a mixture of proper consistency for use under the trowel. To build a first class single brick chimney, it is always advisable to put in a glazed tile flue lining. This lining makes a smooth passage for the smoke and prevents creosote from attacking the mortar. When laying brick around a flue lining, however, it is necessary not to lay the brick in close contact with the flue lining as room must be left for expansion when the flue lining heats up. It would do harm to have some of the mortar squeezed out from between the bricks touching the flue lining, though solid contact between the bricks and the flue lining must be avoided. Space for expansion need probably not be over 1-16 of an inch.

We are publishing herewith a cut showing the construction of flashing

for chimneys. The letter "A" shows the saddle, the flanges of which run under the shingles as indicated by the dotted line; "B" shows the apron on the lower side of the chimney, which is put in place first. The piece "C" is then installed and fitted around the chimney as shown by the dotted lines. The piece "D" is then put over this and also fitted against the side of the brick work. The side flashing pieces "F" and "G" are then installed so as to overlap the strip "D" by at least 2 to 3 inches.

In fitting flashing to a chimney the usual procedure is to rake out the mortar to a depth of 1 1/2 inches and then fit the metal into the joint and replace the mortar with fresh material over the metal. Copper makes probably the best material for flashing, the second choice is sheet zinc, then galvanized iron. The chimney in the drawing is cut away showing the flue lining in place.

### Says Alberta Richest Place On Earth

EDMONTON. — Alberta, with its coal, oil and natural gas, possibly is the richest place on earth, Dr. Charles Camsell of Ottawa, former federal deputy minister of mines, said in an Edmonton interview.

Dr. Camsell, also past-president of the Canadian Institute of Mining and Metallurgy, admitted that the immediate outlook for coal markets is not good because Alberta is so rich in basic fuels. But he said he felt the long-term view should be one of optimism.

The oil pipeline to the lakehead would help solve the immediate problem of markets for Alberta oil.

A good highway from Edmonton to Dawson Creek, B.C., was essential to the development of the northwestern mineral area.

### Weddings

Did you know that September is now a peak month for weddings? For the past several years it has steadily been outstripping June. In fact, last year in Ontario, September had 4,771 weddings as compared with 4,166 for traditional June.

### Helpful Hints

When the top of your polished table is marred by paper that has stuck fast, remove by putting a few drops of sweet oil on the paper and gently rubbing with a soft rag. Polish as usual with furniture polish.

Your blue dungarees will last longer and look better if they're rinsed in a strong solution of laundry bluing after they are washed. In addition you can brush the worn spots at the knees and the seat of the pants with a heavy mixture of the self-same "dye".

Cotton pique should be laundered after each wearing. For the dark dye that rubs off from your suit, coat and handbag use a soft brush to work a heavy lather into these stubborn spots while washing.

## B.C. Fishing Industry Loses \$10 Million

VANCOUVER. — The British Columbia fishing industry has lost \$10 millions in anticipated income, it is estimated. This is due to the famed Adams Lake run of sockeye salmon being a failure. Out of an estimate of 10 million fish that would school at the mouth of the Fraser, only about two million appeared.

Under the International Salmon Fisheries Committee arrangement, Canadian fishermen would have secured about four millions of the salmon. Instead, they got 700,000 worth about \$1 million at the canneries. That cut the estimated pack to the same extent, with a loss of more than 350,000 48-lb. cases to the pack, and a corresponding drop in shore-workers' income.

Fishermen and canneries alike had looked forward to the four-year cycle run of Adams Lake sockeyes to bring them their biggest cash harvest in recent years.

Some \$500,000 had been laid out on special gear this season.

Fishermen had been heavily staked by Chandlers, grocers who expected big season. Fifty boats bought big nets worth \$8,000 each, but many nets came up with only seaweed and a few dozen fish.

One theory is that the disaster is the aftermath of the big weather shift last winter. Ocean currents may have crowded fish to the Alaska shore where the U.S. catch was up, as was Canadian northern inlet catch. But this doesn't account for all fish.

Out of the school, some 500,000 fish were allowed to escape up the Fraser to spawn.

### Board Set Up To Administer Sask. Honey

REGINA. — The provisional honey board have taken office to administer the Saskatchewan honey marketing plan effective from Sept. 25, a bureau of publications release announced. The plan was approved earlier by a 73 per cent. affirmative vote of the commercial honey producers of the province.

Members of the provisional board, all commercial honey producers, are P. C. Colquhoun, Maple Creek, chairman; K. E. Baines, Tisdale; F. R. Barclay, Carrot River; R. Hamilton, Aylsham; and F. Pearce, Leacock. They were named by the honey producers who requested establishment of the plan. Their appointment to administer it for the first year was approved by the producers voting in favor of it.

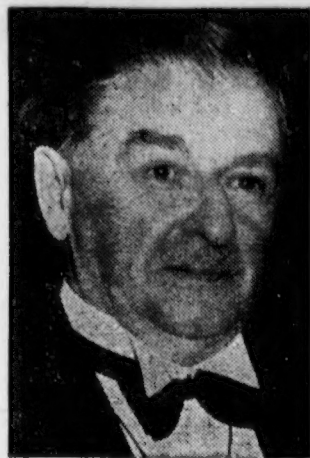

### Rev. N. V. Peale Visits Jack Miner Bird Sanctuary

Another famous name is added to the signatures in the guest book at The Jack Miner Sanctuary. Dr. Norman Vincent Peale, world famous preacher, pastor, author and lecturer in New York City, for years has been interested in the activities of the late Jack Miner and his world famous bird haven.

Recently he visited the home of the late Canadian naturalist where Manly F. Miner, eldest son of the late Jack Miner, puts his arm around Dr. Peale and presented him with an autographed copy of "Jack Miner and the Birds".

It is doubtful if any private home ever entertained more celebrities in every walk of life than has the humble dwelling of the late Jack Miner. Looking over their personal guest register, you find the signatures of such men as Ty Cobb, Henry Ford, R. B. Bennett, James H. R. Cromwell, Sebastian S. Kresge, Richard K. Mellon, Eddie Guest, Stanley Kresge, Eddie Eickenbaker, Mitchell Hepburn, Sir James Dunn, Lady Eaton and hundreds of others.

PREMIER MAURICE DUPLESSIS has been admitted as a Knight of Grace to the Venerable Order of the Hospital of St. John of Jerusalem, Governor-General Alexander, Prior of the Priory in Canada, announced recently. Premier Duplessis is one of 49 Canadians to be admitted or promoted in recognition of their services to the order in Canada.

### KITCHEN MEDITATIONS

#### "BE STILL"

By JANE DALE

If you are troubled, distraught and fearful;  
If every new day fills your heart with dread;  
If there is no beauty on earth or in heaven  
And if you feel now that all laughter is dead—  
"Be still and know that I am God!"  
If life to you has lost its adventure  
And day succeeds day with wearisome care;  
If night brings no rest and dawn no new courage;  
Your burden lies heavy, and no one to share—  
"Be still and know that I am God!"  
When you are quiet and willing to listen  
Peace will come in with infinite calm.  
Will you stop today in your heart rending strivings  
Listen to words which brings comfort and balm—  
"Be still and know that I am God!"

### TRY AND STOP ME!

By BENNETT CERF

Leo Durocher, manager of the Giants, won the nickname "Lippy" as a raw recruit by his unquenchable cockiness and total lack of respect for grizzled big-league veterans. Members of the old Yankee squad still remember the day Durocher trotted out to resume his role of shortstop after injuries had rendered him hors de combat for a month.

In his absence, the team had won 23 games out of 28, and was sporting a current winning streak of 12. As "Lippy Leo" trotted out to the field he yelled, "C'mon, you mugs! I'll pull you out of your slump!"

## Income Of Farmers Show Sharp Drop

OTTAWA. — Canadian farmers got higher prices for wheat and livestock in the first half of 1950, but the amount of cash income they earned in that period was sharply below the cash they got in the first half of 1949.

The bureau of statistics has reported that cash income from the sale of farm products totalled \$870,516,000 in the 1950 period—a drop of 18.6 per cent. from the \$1,069,405,000 earned the previous year, and 5.9 per cent. below the \$925,008,000 earned in the six months of 1949.

Most of the reduction had nothing to do with prices. The bigger income in the 1949 period was due to the fact that the government then announced a 20-cent-a-bushel increase in the price it was paying for western wheat delivered to the Canadian wheat board. The payment, sending the initial wheat price from \$1.55 to \$1.75, covered all wheat delivered to the board since 1945.

Thus, a farmer who had been delivering steadily to the board since 1945 got unusually heavy payments during the first half of 1949. He received his normal payments during the first half of 1950.

The bureau said cash income from the sale of wheat in 1950 was up as a result of both higher initial prices and increased marketings. Smaller markets and lower initial prices reduced income from coarse grains.

With the exception of hogs, income from livestock was higher. Cash income from this source totalled \$389,400,000, an increase of 10.4 per cent. over the 1949 figure of \$352,800,000.

Dairy products income, estimated at \$153,700,000, was seven per cent. below the 1949 total of \$165,000,000. Some of the decline was attributed to lower prices for eggs.

Because of the smaller payments made to western wheat farmers in the 1950 period, the prairie bore most of the cash-income decline.

The bureau said in the case of Saskatchewan, the drop in income amounted to almost 50 per cent., in Manitoba 44 per cent. and, in Alberta, 33 per cent.

## ODD STORIES IN THE NEWS

Two hold-up men bought tickets at a theatre in Brooklyn showing the films "San Quentin" and "Alcatraz Island". Then they robbed the theatre manager of a \$2,200 payroll.

Israel Weintraub, 200-pound bus driver, staked a claim at Atlantic City, N.J., for the title of world's champion clam eater. He put away 126 bivalves in 20 minutes to best a field of 23 in the annual clam and oyster contest.

The gulf hurricane which damaged beaches in the vicinity of St. Petersburg, Fla., recently, did a few people good. Some property had as much as 15 feet of land added to it. The new land came at the expense of the less-fortunate owners, who had great hunks of their property chewed away by the hurricane's high tides.

Strong men blushed at the beer-tasting contest staged as part of the annual hop festival at Paddock Wood, England, centre of the famous Kent county hop-producing area. The winner was 46-year-old Mrs. Catherine Middleditch of London, mother of three girls.

Wren Jeffers, 40, of Quincy, Ill., stepped out of his smashed auto with but two broken fingers, although his car: Ran off the road at a curve; hit the stone steps of a tavern; knocked down a clump of fir trees; hurtled 20 feet into the air and tore down telephone lines; leaped over a parked car and landed on a corner of the tavern; ripped off the tavern sign; smashed the vestibule, and then plowed into three parked cars and damaged the fronts of each.

## OUR COMPLETE SHORT STORY—

## CAN OF CAVIAR

Most Beautiful Woman

Valentino Had Ever Seen.

By HAROLD HELFER

IT WAS about two months after I started working after school for Mr. Primm's Grocery Store that I first saw Miss Fitzhugh steal a can of caviar. She flipped it off the shelf into her purse. I felt embarrassed when she came up to the counter to pay for her groceries and I couldn't make myself say anything about it.

Sometimes around closing time, when there weren't any customers, Mr. Primm would come over and we would chat a little. He mentioned Miss Fitzhugh. I think it was the first or second day after I started working that he pointed her out. "That's Eileen Fitzhugh who used to be on the stage many years ago," he whispered proudly.

I thought maybe I'd better tell Mr. Primm about Miss Fitzhugh stealing the can of caviar and when Mr. Primm came up I started to but before I could say anything he said, "Doesn't Eileen Fitzhugh look lovely in black?" And, instead of telling him about the can of caviar I just nodded.

I watched Miss Fitzhugh whenever she came into the store from then on. Almost without exception, she stole a can of caviar. I'd make up my mind I was going to say something to her or to Mr. Primm but I just couldn't get the words out. Miss Fitzhugh's clothes were a little shabby but there was something well, regal about her. She had a fine, straight nose and her eyes were so clear that, although surrounded by wrinkles, they always shone. Her face was like the faces you sometimes see in old paintings.

There was nothing special about Mr. Primm. He was fat in the middle and almost bald. I suppose that, from the very beginning, I couldn't help but sense his attachment for Miss Fitzhugh. I didn't know how complete it was, though, until one

evening in conversation it came out that I had been given a school theme to write on some celebrity of the past.

"Why don't you write about Eileen Fitzhugh?" Mr. Primm beamed.

"I don't know much about her," I said, hesitatingly. "However, I guess I could talk to her when she comes in and—"

"You won't have any trouble about material," Mr. Primm broke in. "I'll bring my album down tomorrow."

It was a thick leather-bound book of newspaper clippings about Eileen Fitzhugh. Even in the faded pictures, she was beautiful. She had appeared in Broadway hits and had made several early silent movies. Her name had been constantly linked with this or that fabulous character. There were only a handful of clippings after 1930, however, except for a piece every now and then by a newspaper feature writer telling about how the once famous Eileen Fitzhugh was barely able to get by.

You could tell by what she bought at the store that she was having a hard go.

That can of caviar bothered me. After all, it was an expensive item. And a principle was involved.

But Mr. Primm would say, "You should have seen Eileen Fitzhugh in 'The Green Hat', or 'Did you know that Valentino once said that Eileen Fitzhugh was the most beautiful woman he ever had seen?'"

In the store, Mr. Primm knew his place. He worshipped Eileen Fitzhugh from afar, never pushing himself on her.

It was along about October that I noticed that Miss Fitzhugh's visits to the store were becoming less frequent. And then one day there was an item in the paper that she was ill. She died the first week in November.

It wasn't until after Mr. Primm and I got to the funeral parlor that it came to me how unusual it was for a grocer to close his store on the death of a customer. He must have been really deeply fond of her, I thought, glad I'd never told him about that caviar business.

As Mr. Primm filed by the casket, he dropped something into it. I took a sharp look as I went by.

It was a can of caviar.  
(Copyright Wheeler Newspaper Syndicate)

The British Commonwealth Air Training Plan produced more than 131,000 aircrew during the Second World War.

**FREE HAIRCUT**—An unexpected haircut was ordered for this U.S. soldier in Korea. A sniper's bullet pierced his helmet, creased his scalp, which, the haircut showed, was only scratched.—Central Press Canadian.

### Funny and Otherwise

The farm boy home from college for the weekend said at the breakfast table: "Dad, I got up at dawn just to see the sun rise."

"You couldn't have picked a better time," replied Dad.

A tall cowhand wearing a ten-gallon hat was sauntering around in a large department store, and the salesgirl asked if she might help him. He replied: "No, ma'am, I reckon not. I've never seen so much I could do without."

"What an interesting mountain. There must be stories about it."

"Sure are. Once two people went up there and never came back."

"Goodness! What happened?"

"Went down the other side."

Customer—Waiter, this soup is cold. Bring me hot soup.  
Waiter—What, and burn my thumb?

Laugh and the teacher laughs with you;  
Laugh and you laugh alone.

The first was a joke of the teacher. The last was a joke of your own.

A man answering an ad for a chauffeur's job was being examined by the car owner. He was asked if he travelled much in other states.

"Yes sir," replied the prospective chauffeur.

"All right," said the car owner, handing him a map, "let's see you fold it." 2900

### More Manitoba Farms Get Electrical Power

WINNIPEG. — Ideal weather in August enabled the Manitoba power commission's rural electrification programme to surge ahead, a report from W. D. Fallis, general manager, stated.

Electric service was made available in August to 629 farms in the municipalities of Glenwood, Whitehead, Lansdowne, Langford, Cameron, Westbourne, South Cypress, Oakland, Saskatchewan, Pipestone and Albert. In addition, extensions were completed to small groups of farms not previously reached in the municipalities of Stanley, Grey, Lorne, Roland, Dauphin, Gilbert Plains and Grandview.

To Live Right — Eat Right.

### Man. Woman Has Unusual Hobby

MINNEDOSA, Man. — The village of Newdale, 20 miles west of here, boasts a woman with an unusual hobby. Mrs. Morris Lavery is a gardener—but not the usual kind. She grows citrus fruits.

Mrs. Lavery's tropical garden consists of a four-foot orange tree which has so far produced two ripe, rich oranges, and a lemon tree which last year bore a gigantic lemon 11 inches in circumference.

She also had a grapefruit tree which grew so vigorously that she planted it outside. Fall frost destroyed it.

Elephants at birth weigh from 160 to 200 pounds.

### Tender OATMEAL ROLLS

They "pan out" perfectly with new Fast DRY Yeast!

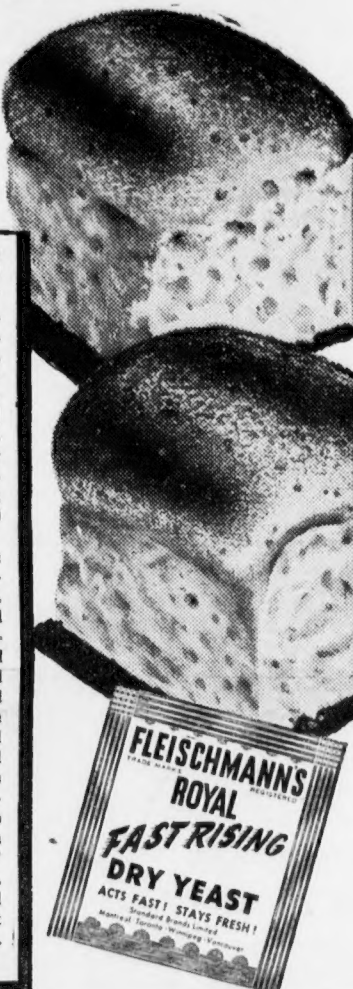

• No more yeast worries!

No more yeast that stales and weakens! New Fleischmann's Royal Fast Rising Dry Yeast keeps FULL STRENGTH till you use it—FAST ACTING when you use it! Needs no refrigeration—get a month's supply and keep in your cupboard!

#### OATMEAL ROLLS

• Stirring constantly, quickly pour 1 c. boiling water into ¾ c. oatmeal. Scald ¾ c. milk, 2 tbs. granulated sugar, 1½ tps. salt, 2 tbs. molasses and 3 tbs. shortening; cool to lukewarm. Meanwhile, measure into a large bowl ½ c. lukewarm water, 1 tsp. granulated sugar; stir until sugar is dissolved. Sprinkle with 1 envelope Fleischmann's Royal Fast Rising Dry Yeast. Let stand 10 minutes, THEN stir well.

Mix in oatmeal, then lukewarm milk mixture. Stir in 2 c. once-sifted bread flour; beat smooth. Work in 2½ c. (about) once-sifted bread flour. Knead on lightly-floured board until smooth and elastic. Place in greased bowl and grease top of dough. Cover and set in a warm place, free from draught. Let rise until doubled in bulk. Punch down dough and turn out on board sprinkled with oatmeal; cut into 2 equal portions and cut each portion into 16 pieces. Knead into smooth balls and arrange in 2 greased 8" square cake pans. Grease tops. Cover and let rise until doubled in bulk. Bake in moderately hot oven, 375°, about 30 minutes. Yield—32 small rolls.

The Carbon Zion Men's Chorus had their first fall and winter rehearsal in the Baptist Church on Monday evening. The chorus is making preparation for their fall and Christmas concert. A good group of happy singers turned out for the first practice.

The Carbon Baptist Church expects to have their annual mission festival on Sunday, Oct. 15th. The Zion Baptist Church will have their Harvest mission festival on Sunday, Oct. 29th.

Mrs. Ed Martin and sons, Walter and Arnold, are holidaying in North and South Dakota.

Mrs. Alice Smyrl and Mrs. Tom Barber of Calgary, Mr. and Mrs. Jack Kundert of Elkwater, Mr. and Mrs. Albert Smeal of Michichi, and Mr. and Mrs. G. O. Salows of Nacmire attended funeral services held in Carbon Monday for Mrs. Ann Barber.

It was decided to continue with the Carbon Community Centre project at the meeting Monday night. The charter has been received from the government and to comply with regulations in voting on the proposed project, cash donations of \$5 or more must be made by town and district residents to enable them to have an official voice in future decisions. Canvassers will again tour the district in this respect and a meeting called at a later date. No start will be made on the hall project this year.

Lions Club members present stated that if no hall was started this year the club planned to go ahead with immediate repairs to the Scout hall as a temporary measure to improve recreational facilities in Carbon. The meeting approved of this action.

Enter the Lions Beard Growing Contest! Prizes will be given

for the Best Beard, Neatest Beard and ??? Beard. Contest lasts a month. Make entries to Chronicle office or Lion Club members.

—Alex R. McTavish, R.O., Graduate Optometrist, will visit Shaw's Drug Store, Carbon, Monday afternoon, October 9th.

The regular meeting of the Carbon Local of the F.U.A. was held in the Legion hall Monday evening at 8 p.m. Considerable discussion took place on the dissatisfaction of farmers in general in respect to the prices and grading of wheat.

An attempt will be made to secure the services of Carl Stimpfle, F. U. A. president, and H. G. Hammell, M.L.A., as guest speakers at a meeting in the near future. The meeting will be open to the public and a good crowd of town residents and farmers is anticipated. Announcement of time and place of the meeting meeting will be made later.

The subject of the junior Grain Club was brought to the attention of the meeting and \$10 was voted to the club for prizes.

The meeting adjourned at 10 p.m.

#### CARD OF THANKS

I wish to thank my kind friends and relatives for their flowers, cards and visits while I was a patient in hospital.

MRS. RUDY MARTIN

#### CARD OF THANKS

We wish to thank our many friends for their kind expressions of sympathy, cards and flowers during our recent sad bereavement, and especially extend sincere thanks to Mr. Sam Garrett and Dr. McFarlane.

Mr. and Mrs. Jack Barber  
Mr. and Mrs. E. J. Harrison
